SUMMARY:

Full-stack Developer with **6 years** of hands-on experience in software development. Having strong proficiency in React, Node.js, Express. Experience in building RESTful APIs and working with .NET Core, Flutter and databases such as SQL server and MySQL, MongoDB. Expertise in both front-end and back-end technologies.

Solid understanding of cloud platforms like Azure and AWS, deployment tools and software architecture, contribute to CI/CD pipelines. Continually learns the latest technologies and implements the best practises.

WORK EXPERIENCE:

Full-stack web Developer

Al Jazira Poultry Farm (by Al Ain Farms)

Dubai, UAE.

Nov 2023 — present

- Developed and maintained web responsive, user-friendly websites using ReactJS enhancing functionality and user experience.
- Worked on mobile app development using React Native, creating cross-platform applications and ensuring a consistent user experience across iOS and Android.
- Integrated and maintained third-party APIs to enhance functionality.
- Work with relational databases such as SQL Server and MySQL.
- Work across technologies including PHP, Laravel, MongoDB, Express, Node.js and Flutter.
- Manage deployments and infrastructure on cloud platforms like AWS or Azure.
- Conduct code reviews, write unit and integration tests, and contribute to continuous integration/continuous delivery (CI/CD) pipelines.
- Develop and maintain specific applications, CRM, or ERP systems.
- Build responsive and user-friendly front-end interfaces with a strong focus on UI/UX principles.

Senior software Developer (Full-stack web applications)

Dimaag, Bangalore, India

May 2022 – July 2023

- Design and develop high-performance web applications using MEAN and MERN stacks.
- Architect and implement RESTful and GraphQL APIs.
- Implement frontend logic with Angular 12+ and React 17+, integrating with backend APIs and state management (Redux/NgRx).
- Develop middleware and backend logic using Node.js with Express.js, including JWT-based authentication

and RBAC.

- Work with MongoDB (Replica Sets, Aggregation Framework) for designing scalable NoSQL schemas.
- Handle performance tuning, caching strategies (Redis), and database indexing.
- Set up and maintain Dockerized environments for local and cloud deployments.
- Create and manage CI/CD pipelines (GitHub Actions / Jenkins / GitLab CI).
- Deployments on AWS/GCP/Azure, including EC2, Lambda, S3, Cloud Functions, etc.
- Conduct code reviews and enforce best practices (SOLID, DRY, KISS, TDD/BDD).

Software Developer

Dimaag, Bangalore, India

May 2021 – April 2022

- Develop and maintain fullstack web applications using modern JavaScript frameworks such as Vue.js or React and Node.js, .NET Core, Flutter.
- Architect and build robust backend systems with a strong focus on performance and scalability.
- Integrate and consume RESTful APIs to support dynamic application functionality.
- Write clean, maintainable, and well-documented code following best practices and coding standards.
- Design and implement complex and high-performance SQL queries..
- Manage version control using Git, ensuring well-structured commit histories and smooth team collaboration.

Senoir Full-stack Developer

Innova Solutions, Bangalore, India

March 2020 –Aug 2021

- Design, develop, test, and maintain scalable full-stack web and mobile applications.
- Work across technologies including PHP Laravel, MongoDB, Express, React, Node.js and Flutter.
- Implement RESTful APIs and integrate third-party services and APIs.
- Work with relational databases such as SQL Server and MySQL.
- Collaborate with cross-functional teams including designers, product managers, and QA engineers to deliver high-quality software..

Full-stack Developer

Design Flash, Bangalore, India

Jan 2019 – Feb 2020

- Design, develop, test, and maintain scalable full-stack web and mobile applications.
- Developed responsive, user-friendly websites using HTML5, CSS3, JavaScript, and ReactJS.
- Worked on mobile app development using React Native, creating cross-platform applications and ensuring a consistent user experience across iOS and Android.

PROJECTS:

SatyamTours

Role: Senior Full-stack developer and Mobile App Developer

Technologies: ReactJS, React Native, Redux, Material-UI, REST API

Description: Developed a comprehensive travel agency web application for managing travel bookings and itineraries. Implemented features such as user authentication, booking management, and a responsive UI. Integrated with a REST API to handle data operations and ensure seamless user interactions.

Link: [SatyamTours](#)

Suriwebwinkel

Role: Full-stack developer and Mobile App Developer

Technologies: React Native, Expo, Redux, API Integration

Description: Developed a mobile app for an online store with product browsing, cart management, and user authentication. Integrated APIs for real-time data.

SKILLS:

React JS, MongoDB, Express, Node JS, MySQL, React Native for iOS and Android app development, Elastic Search, and Azure Cloud. skilled in Geolocation, SEO, CRM, SQL databases, data structures, data analysis, Swift, Android, ASP.NET, MVC, Flutter, Git, RESTful APIs and integrate third-party services and APIs.

As a Software Architect, and Full Stack Developer, I have also demonstrated my ability to oversee the end-to-end development process, design scalable and robust software architectures, and set up CI/CD pipelines and seamless deployments.

EDUCATION:

Visvesvaraya Technological University, Belgaum, India

M. Tech in Computer Science & Engineering

Dec 2020 — Sep 2022

Visvesvaraya Technological University, Belgaum, India

B. Tech in Computer Science & Engineering

July 2016 — Sep 2020

LANGUAGES:

English (Fluent), **Hindi** (Native), and **Arabic** (Elementary)
