PROFILE

Full Stack Web Developer holding Master's degree with over 6 years of rich experience in productive, reliable and engaging enterprise Desktop/web application development. Proficient in PHP framework utilization, particularly Laravel, for creating robust and efficient web applications. Ability to understand and transform complex business requirements into web application and software such as ERP systems, financial modules. Committed, motivated, sincere and punctual with excellent analytical, problem solving skills.

PROFESSIONAL EXPERIENCE

11/2023 - present
Dubai,
United Arab Emirates

Full Stack Web Developer

Al Jazira Poultry Farm (by Al Ain Farms)

- Develop and maintain fullstack web applications using modern JavaScript frameworks such as React and Node.js.
- Architect and build robust backend systems with a strong focus on performance and scalability.
- Integrate and consume RESTful APIs to support dynamic application functionality.
- Write clean, maintainable, and well-documented code following best practices and coding standards.
- Design and implement complex and high-performance SQL queries.
- Participate in code reviews, offering constructive feedback and promoting knowledge sharing across the team.
- Troubleshoot and resolve performance issues, optimizing code for efficiency and reliability.

05/2022 - 08/2023
Bengaluru,
India

Principal Software Engineer (Full Stack Web Applications)

Evenion Technologies

- I was responsible to implement new features and the maintenance of this product along with some other developers in and across the team.
- I had worked on complex modules which processes hundred and thousands of records daily.
- Consult with lead for identified problems and suggest solutions for the resolution.
- Design and develop high-performance web applications using MEAN and MERN stacks.
- Architect and implement RESTful and GraphQL APIs.
- Implement frontend logic with Angular 12+ and React 17+, integrating with
- backend APIs and state management (Redux/NgRx).
- Develop middleware and backend logic using Node.js with Express.js

- Work with MongoDB (Replica Sets, Aggregation Framework) for designing scalable NoSQL schemas.
- Create and manage CI/CD pipelines (GitHub Actions / Jenkins / GitLab CI).
- Develop and maintain web applications, CRM, or ERP systems.

05/2021 - 07/2022

Bengaluru,
India

Senior Full Stack web developer

Evenion Technologies

- Design, develop, test, and maintain scalable full-stack web and mobile applications.
- Work across technologies including PHP (Laravel, CodeIgniter, Symfony), MERN stack (MongoDB, Express, React, Node.js), and Flutter.
- Implement RESTful APIs and integrate third-party services and APIs.
- Work with relational databases such as SQL Server and MySQL.
- Participate in the full software development lifecycle, following Agile methodologies.
- Manage deployments and infrastructure on cloud platforms like AWS or Azure.
- Conduct code reviews, write unit and integration tests, and contribute to continuous integration/continuous delivery (CI/CD) pipelines.

03/2020 - 05/2021

Bengaluru,
India

Senior Full Stack developer

Renaissance Technologies

- Develop and maintain web applications using React for frontend, Python for backend Integration
- Design, build, and optimize scalable and robust backend systems.
- Collaborate with cross-functional teams to define, design, and deliver new features.
- Ensure the performance, quality, and responsiveness of applications.
- Troubleshoot and debug applications to optimize performance.
- Write clean, maintainable, and scalable code following best practices.

01/2019 - 02/2020

Bengaluru,
India

Full Stack developer

Design Flash

- Create visually appealing and responsive front-end interfaces using HTML5, CSS3, and JavaScript.
- Develop and maintain fullstack web applications using modern JavaScript frameworks such as Vue.js or React and Node.js.
- Architect and build robust backend systems with a strong focus on performance and scalability.
- Integrate and consume RESTful APIs to support dynamic application functionality.
- Write clean, maintainable, and well-documented code following best practices and coding standards.
- Design and implement complex and high-performance SQL queries.
- Collaborate with the DevOps team to deploy, monitor, and maintain applications.

SKILLS

- ReactJS
- RESTFul API
- MongoDB
- HTML
- CSS
- DevOps
- Laravel
- Java
- MySQL
- Asp.NET
- PHP
- NodeJS
- Python
- AWS
- Git & GitHub
- JavaScript

CERTIFICATES

Cloud Infrastructure (AWS)

Ministry of Education, Government of India

Cyber Security

Ministry of Education, Government of India

Python Programming

Machine Learning

Technex, IIT(BHU) Varanasi

EDUCATION

10/2020 - 09/2022 Belgaum, India	Masters in Computer Science and Engineering (G.A.T.E scholar) <i>GPA 4.25/5.0</i> <i>Visvesvaraya Technological University</i>
05/2016 - 07/2020 Belgaum, India	Bachelor in Computer Science and Engineering <i>Visvesvaraya Technological University</i>
